

SOC Technologies Quality Policy

Updated October 20, 2025

At System-On-Chip (SOC) Technologies, we are committed to delivering high-performance semiconductor intellectual property (IP) solutions for video-based electronic systems. Our goal is to exceed customer expectations by providing innovative, reliable, and high-quality products and services that meet the demands of an evolving technology landscape.

To achieve this, we are dedicated to:

- Continually improving the effectiveness of our quality management system to ensure the highest level of product performance and reliability.
- Adhering to industry best practices and regulatory standards in the development of semiconductor IP for video systems.
- Fostering a culture of innovation, collaboration, and excellence across all levels of our organization.
- Ensuring timely delivery of products and services that meet or exceed customer requirements.
- Providing a safe and supportive working environment that promotes personal and professional growth.
- Upholding our commitment to sustainability and environmental responsibility in all aspects of our operations.

Through our dedication to quality, innovation, and customer satisfaction, SOC Technologies aims to remain a trusted partner in the semiconductor industry.
